TRUE CORDLESS™ Battery Powered Technology

Our First Hot Melt Glue Gun You Can Use With Batteries, Removable Cord or Both

Hampton, NH December 6, 2011 - [Adhesive Technologies, Inc.](http://www.adhesivetech.com), the innovator of hot melt glues, glue guns and adhesive systems for more than 25 years is proud to announce our [Hybrid Cordless™](#) Glue Gun. As an industry leader we have seen the need for versatility in the crafting industry and we've created a gun that can keep up in any environment.

The Hybrid Cordless™ Glue Gun is the perfect glue gun – safe, convenient and portable. It can handle all kinds of projects from paper and detailed crafts to home repairs. Battery-powered, it goes anywhere, or can be used plugged in for continuous use. With no cord to get in the way, the Hybrid is easy to share and its battery stand keeps the gun upright and ready to use. The Hybrid makes hot melt gluing easier and better than ever!

Boasts 12W of power while using 4 AA rechargeable batteries and can last up to 75 minutes on one charge. A RED LED light indicates battery or cord use. A precision non drip nozzle helps prevent glue mess. Uses [Low Temp™](#) or [MultiTemp™](#) MiniSize Gluesticks™

For more than 25 years, Adhesive Technologies, Inc. has been a leading innovator of quality, highly effective and easy-to-use hot-melt glues, glue guns and adhesive systems for the consumer and industrial markets. With an emphasis on research and development, AdTech specializes in the delivery as well as formulation of its adhesive products to ensure expert application and optimal performance. Its consumer products are available under the AdTech brand in a wide range of craft and retail outlets nationwide. For more information, please call 800.GLUE.GUN or visit adhesivetech.com.
